THE DISH: The kitchen is a hive of activity, with space for Lisa, who's the founder of Grapevine Designs, her husband and their three kids. When they built the home, they decided to create a great room that would encompass kitchen, dining nook and family room (not shown).

WHAT MAKES IT WORK:

The resulting open-concept space revolves around the island and its breakfast bar. Classic Shaker-style millwork and a subway tile backsplash create a white backdrop that's livened up with colourful stools, bowls and cookbooks. There's also a spacious walk-in pantry with a second fridge, freezer and loads of extra counter space.
